

Solution brief

Planview Enterprise Content Pack for Microsoft Power BI

Visualize Work and Resource Management Data in a New Way

Data preparation is one of the top challenges for businesses of all sizes. This has sparked an explosion in self-service data analysis solutions.

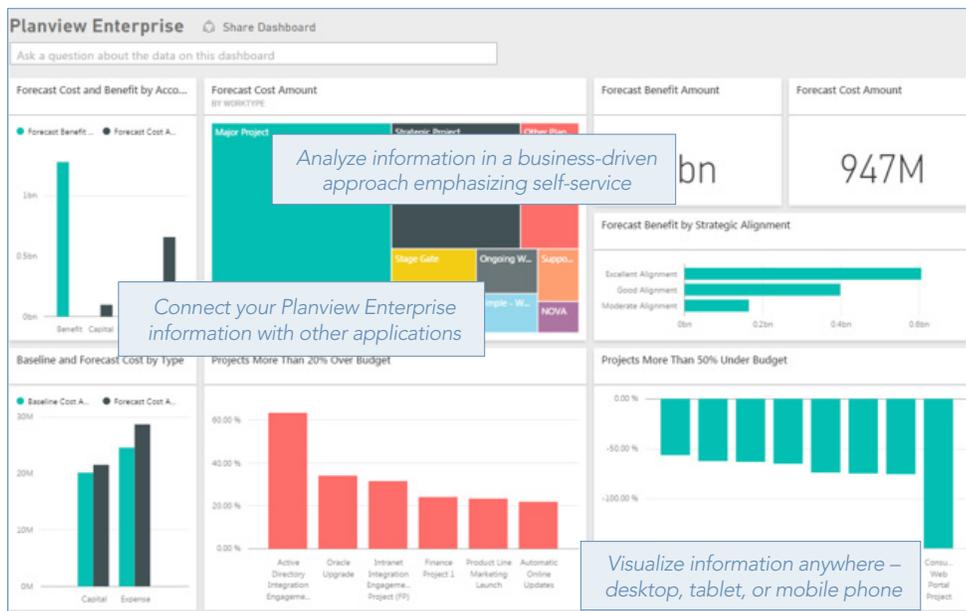

The right tools not only empower users and eliminate the manual work of data collection, they free up people to focus on more meaningful strategic activities important to the business.

One Data Source for Reliable Answers

Microsoft Power BI® is a suite of business analytics that enables you to analyze data and share insights. The Planview Enterprise® content pack for Microsoft Power BI® gives you a consolidated view of data across the entire lifecycle of your portfolios – products, services, financials – from the day a project starts, to the day the project ends.

With dynamic dashboards, interactive reports, and ability to connect to different Planview Enterprise data, stakeholders get reliable answers to drive better business decisions.

OVERVIEW

With Microsoft Power BI:

- Visualize information with insightful, business-oriented dashboards
- Interact with information in a user-friendly approach
- Ask questions in real business language and see real-time results
- Connect different data sources into a single enterprise view
- Create reporting consistency across the enterprise by building reusable models

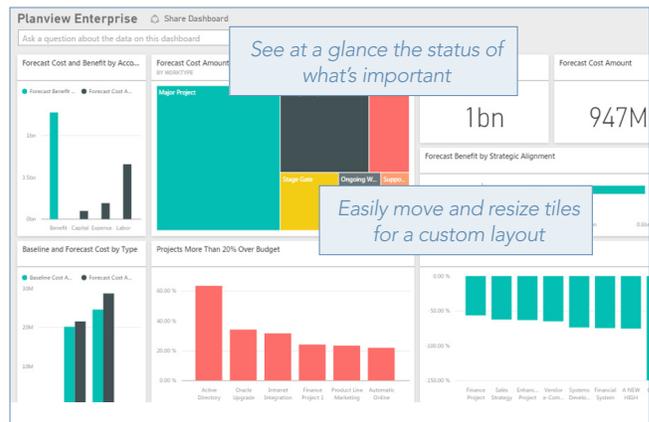

Planview Enterprise + Microsoft Power BI: bring portfolio data to life

Bring Your Data to Life

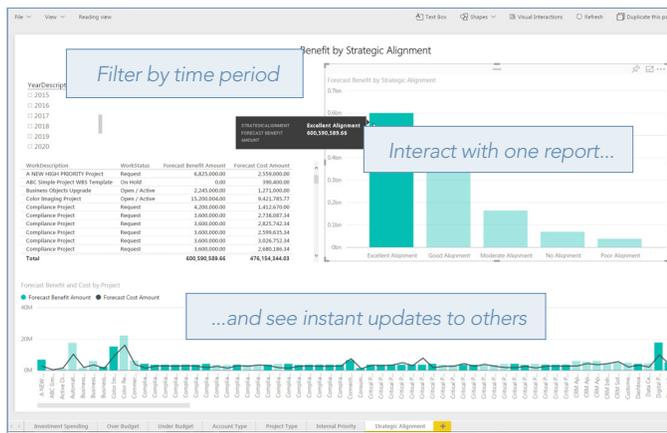

Simplify data preparation, speed self-serve analysis, and ensure data reliability: that's the promise of Planview Enterprise + Microsoft Power BI.

Easily add and merge data sources from all across your enterprise – Planview products: Planview Enterprise, Projectplace®, and Troux® – and other applications, like Salesforce.com®, Google Analytics®, Github® and more. In this highly secure solution, you'll quickly see exactly how your entire organization is performing, no coding needed.

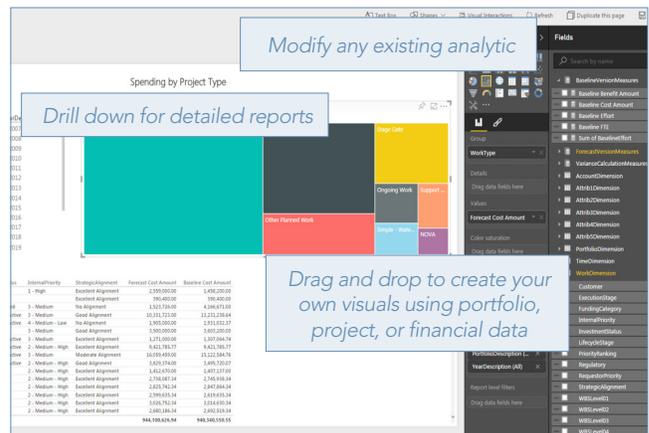

DYNAMIC DASHBOARDS

INTERACTIVE REPORTS

CUSTOMIZED VIEWS

Ask business questions: get actionable answers. Start with the executive-level view and drill down to individual resources and specific project milestones. Easily change precisely which data points are relevant and see in real time only those answers that matter, so you can take the right actions decisively.

It's all here, just a click away, with Planview Enterprise and Microsoft Power BI.
